#### **EVALUATION**

#### Three Tasks

1 Get a Stripe ticket for an Adult.

2 Get a single ticket for a student and a senior.

Get a weekly ticket for a route.

#### RESULTS

#### Did you have difficulties using the System?

People were used to the old machine and had to learn the new system. Their expectation differed from ours.

The payment was unclear. People expected a confirmation button.

#### Is the System intuitive?

#### Do you think the system is fast?

#### Oberservations during testing.

People didn't expect the map to be interactive.

The overall design is perceived as fitting to the content.

The Icons were perceived as very clear without any problems.

When buying a ticket for two, people expected to only get one.

The payment button should be more prominent.

The genereal opinion was, that if you learn the system it will be faster then the current one.

# 감사합니다 DANKE
